

ABSTRACT OF THE DISCLOSURE

Naphthalenetetracarboxylic acid diimide derivatives include a structure represented by the following formula:

in which, R₁, R₂, and R₃ are each independently any one selected from the group consisting of hydrogen; halogen; substituted or unsubstituted alkyl of C₁ to C₂₀; substituted or unsubstituted alkoxy of C₁ to C₂₀; substituted or unsubstituted aryl of C₆ to C₃₀; and substituted or unsubstituted aralkyl of C₇ to C₃₀. An electrophotographic photoconductive material includes the naphthalenetetracarboxylic acid diimide derivatives as an electron transferring material.
